Public company (publ)

New segment reporting and new accounting principles for the Skanska Group

Starting in 2010, changes in the accounting rules in the International Financial Reporting Standards (IFRSs) affect segments, Residential Development (IFRIC 15), Commercial Development (IFRIC 15) and Infrastructure Development (IFRIC 12).

Under the new rules, capital gains in Residential and Commercial Development are recognized only when the purchaser takes possession of the property, which is generally much later than the date when a binding contract is signed. In the accounting method applied to date, capital gains have been recognized successively after the signing of the sales contract and according to the percentage of completion.

Since the new accounting method (IFRIC 15) does not reflect the way that the Senior Executive Team and the Board of Directors monitor operations, a new segment reporting method will be presented, in which recognition of capital gains is based on the date when a binding sales contract is signed. The previous percentage of completion method for these two segments will thus disappear entirely in the future.

As a result of the new accounting rules, cooperative housing associations are also included in their entirety in Skanska's accounts, implying an increase in current-asset properties and financial current liabilities compared to earlier.

To further increase the transparency of its accounting, Skanska will transfer residential development and commercial development operations that have been carried out as part of Construction in the Nordic countries to the Residential and Commercial Development segments. These two segments will include all of the Group's operations in these segments.

As for Infrastructure Development, the new IFRIC 12-compliant accounting method means that income from joint ventures and associated companies is reported earlier than previously, with the added result that the carrying amount of these investments increases. In the future, the difference compared to market value will thus decrease.

Since the new IFRIC 12-compliant accounting method reflects the way that the Senior Executive Team and the Board of Directors monitor operations, the previous accounting method will disappear entirely. Market value figures will also continue to be presented.

The new accounting rules do not change the way that Skanska has previously reported its Construction operations. The effects of the new rules on cash flow and financial position are marginal, which means that these reports will follow the new rules in the future

To summarize, in coming financial reports Skanska will present two income statements: one in which capital gains are recognized according to the segment reporting method in Residential and Commercial Development, and one in compliance with the new IFRS rules. The income statement based on segment reporting will primarily be used by the Board of Directors and the Senior Executive Team to monitor operations. The Group's incentive programs are primarily based on segment reporting, which will also provide guidance for the Board's dividend decisions.

The Group's financial reports for 2009 have been restated. The effects on the Group's financial statements for the full year 2009, the opening balance for 2009 and segment reporting for 2009 are presented in the following document.

Segment reporting

- New segment reporting principle for the Residential Development, Commercial Development and Infrastructure Development segments
- Reporting of Construction according to segment reporting conforms to previous reporting of these operations
- Effective in 2010, residential and commercial development previously carried out as part of Construction operations in the Nordic countries is being reported in the Residential Development and Commercial Development segments
- Interest-bearing assets and liabilities are not affected by segment reporting, which means that net financial items are the same according to segment reporting and IFRS-compliant reporting
- In the Group's future quarterly reports and other financial presentations, segment reporting will serve as the basis for analysis
- Profit for the year 2009 is SEK 626 M lower than profit according to the new IFRS-compliant accounting

IFRIC 15 - Agreements for the Construction of Real Estate

- Affects the reporting of project operations both in Commercial Development and Residential Development
- Revenue recognition of property divestments and residential sales will not occur until the purchaser gains legal ownership of the property/residential unit, which normally coincides with taking possession of the property
- Interest-bearing liabilities increase, since liabilities that were previously charged only to the cooperative housing association (Sweden) and the housing corporation (Finland) are now recognized as financial liabilities to the Group
- The purchase price receivable on divestment of commercial properties, which was previously recognized as a receivable, remains as a current-asset property until the purchaser takes possession of the property
- Profit for the year 2009 increases by SEK 318 M
- Equity on December 31, 2009 decreases by SEK 577 M, of which SEK -917 M is due to restatement of prior years and thus affects equity on January 1, 2009
- Interest-bearing net receivables on December 31 decrease by SEK 4,433 M, of which SEK 2,553 M is related to Residential Development and SEK 1,880 M is related to Commercial Development

IFRIC 12 - Service Concession Arrangements

- Affects Skanska Infrastructure Development
- For joint ventures and associated companies, this means earlier and more uniformly recognized income
- Profit for the year 2009 increases by SEK 275 M
- Equity on December 31, 2009 increases by SEK 287 M

For further information, please contact:

Hans Biörck, Executive Vice President and CFO, Skanska AB, tel +46 10 448 8832 Pontus Winqvist, Senior Vice President, Investor Relations, Skanska AB, tel +46 10 448 8851 Peter Gimbe, Press Officer, Skanska AB, tel +46 10 448 8838, cell phone +46 70 543 88 38

The content in this release will be presented at a Capital Marketing Meeting at 3:00 p.m. CET on April 19, at the Scandic Anglais Hotel, Humlegårdsgatan 23, Stockholm, Sweden. The presentation will be broadcast in a live audio feed at www.skanska.com/investors and will later also be available there as a recording. This and previous releases can also be found at www.skanska.com/investors.

To participate in the telephone conference, please dial +46 8 505 598 53, or +44 203 043 2436, or +1 866 458 4087.

Skanska AB may be required to disclose the information provided herein pursuant to the Securities Market Act.

IFRIC 12

Accounting principles

IFRIC 12, "Service Concession Arrangements," which affects Skanska Infrastructure Development, deals with the question of how the operator of a service concession should account for the infrastructure as well as the rights it receives and the obligations it undertakes under the agreement. The operator constructs or upgrades infrastructure (construction or upgrade services) used to provide a public service and maintains the infrastructure (operation services) for a specified period of time. The consideration (payment) that the operator receives shall be allocated between construction or upgrade services and operation services according to the relative fair values of the respective services. Construction or upgrade services are reported in compliance with IAS 11 and operation services in compliance with IAS 18. For construction or upgrade services, the consideration may be rights to a financial asset or an intangible asset. If the operator has an unconditional right in specified or determinable amounts, it is a financial asset. If the operator instead has the right to charge the users of the public service, it is an intangible asset.

Application and effects

Through part-ownership of joint ventures, Skanska participates in many projects that are covered by IFRIC 12.

When constructing or upgrading infrastructure, the consideration may consist of rights to a financial asset or to an intangible asset. Only in the case of the Autopista Central has this been deemed to be an intangible asset.

The estimated total revenue of a project during the contractual period is allocated between construction or upgrade services and operation services. The portion related to construction or upgrade services is recognized as revenue by using the percentage of completion method. If operation services are compensated through a return on a financial asset, an amount that provides a uniform return between years for operation services is recognized as revenue each year. If an intangible asset has instead been recognized, revenue recognition complies with IAS 18 and the carrying amount of the intangible asset is recognized in compliance with IAS 38 and IAS 36.

IFRIC 12 will result in an acceleration of income in an infrastructure project, since the carrying amount of construction or upgrade services is determined on the basis of the total value of the project to the operator. As a consequence of this acceleration, the transition to IFRIC 12 affected equity in the opening balance on January 1, 2009 in the amount of SEK +86 M.

As a result of the reporting of infrastructure projects in compliance with IFRIC 12, all intra-Group profits on infrastructure projects that have arisen when Construction units have performed assignments for Infrastructure Development have been reversed, because the portion of projects related to construction or upgrade services is now recognized as revenue using the percentage of completion method. This affected 2009 gross income in the amount of SEK 65 M. The effect on the opening balance for the item "Investments in joint ventures and associated companies" is SEK +220 M and for equity, after taking taxes into account, the effect is SEK +135 M. The total effect of IFRIC 12 on equity in the opening balance is SEK +221 M.

The Autopista Central expressway concession in Chile, which was previously recognized as an intangible asset, has been reclassified in the opening balance to "Investments in joint ventures and associated companies" in the amount of SEK 572 M. Yearly depreciation is now recognized under the item "Income from joint ventures and associated companies" and no longer under "Gross income." Depreciation for the full year 2009 amounted to SEK 28 M.

For the full year 2009, the income statement item "Income from joint ventures and associated companies" was affected in the amount of SEK +261 M. Of this amount, SEK +274 M comes from Infrastructure Development operations and SEK -13 M from "Central and eliminations" and consists of an adjustment of intra-Group profits. "Other comprehensive income" for the full year 2009 is affected in the amount of SEK -231 M due to the impact on cash flow hedging related to the Autopista Central in Chile.

IFRIC 15

Accounting principles

IFRIC 15, "Agreements for the Construction of Real Estate," is applied to accounting for revenue and expenses when a company undertakes the construction of real estate. The interpretation addresses the issue of whether accounting for construction of real estate should be in accordance with IAS 11 or IAS 18, and when the revenue from the construction of real estate should be recognized. It assumes that the company retains neither an involvement nor effective control over the real estate to an extent that would preclude recognition of the consideration as revenue.

IAS 11 shall be applied when the buyer can specify the structural elements of the design of the real estate before construction begins, or specify major changes once construction is in progress. Otherwise IAS 18 shall be applied. If IAS is applied, it must first be determined whether the agreement is an agreement for the rendering of services or for the sale of goods. If the company is not required to acquire or supply construction materials, it is an agreement for rendering of services, and revenue is recognized according to the percentage of completion method. If the company is required to provide services together with construction materials, it is an agreement for the sale of goods. Revenue is then recognized when, among other things, the company has fulfilled the criterion that it has transferred to the buyer the significant risks and rewards associated with ownership, which normally occurs upon the transfer of legal ownership, which often coincides with the date the purchaser takes possession of the property.

Application and effects

IFRIC 15 will have an effect on the accounting for Skanska's project operations in both Commercial Development and Residential Development.

As for Commercial Development, to date the divestment of completed current-asset properties has been recognized as revenue during the reporting period when binding sales contracts have been signed. If the divestment has concerned a not yet completed property, of which the buyer takes possession only after completion, income has been reported successively as the property is completed (percentage of completion). When IFRIC 15 is applied, revenue recognition of a property divestment will occur only when the purchaser gains legal ownership of the property, which normally coincides with taking possession of the property.

In Residential Development, the reporting of residential projects that are started at the Group's own initiative will be affected. This will mainly affect residential projects in Sweden and Finland, where housing corporations and cooperative housing associations, respectively, are used to reach the individual home buyer. When applying the accounting principle used until now, recognized profit has been proportional to both the degree of accrual (percentage of completion) and the degree of sales when it has concerned a construction project that includes liability to the customer for divestment of completed housing units. When applying IFRIC 15, revenue recognition is postponed until the date when the home buyer takes possession of the unit.

In the income statement, the consequence of applying IFRIC 15 will be that revenue will vary more between reporting periods than to date, because using the percentage of completion method has had an income-smoothing effect. Sales revenue and income from property divestments will also be recognized at a later date. The effect on equity in the opening balance is SEK -917 M. Operating income for the full year 2009 increases by SEK 457 M.

In the statement of financial position, the carrying amount of current-asset properties and interest-bearing liabilities has increased substantially. In the opening balance on January 1, 2009 and the position on December 31, 2009, the following items have been affected by IFRIC 15.

	31-Dec	1-Jan
Effects of IFRIC 15	2009	2009
Current-asset properties	4,360	5,363
Interest-bearing receivables	-1,880	-1,681
Deferred tax assets	-15	103
Operating receivables	-399	-615
	2,066	3,170
Equity	-577	-917
Interest-bearing liabilities	2,553	3,043
Deferred tax liabilities	-139	-133
Operating liabilities	230	1,176
	2,066	3,169
Interest-bearing net receivabl	-4,433	-4,724

The carrying amount of current-asset properties increased by SEK 4,360 M (5,363) because an individual property will leave the Group on a later date and because accrued contracting expenses in residential properties will be recognized at the cost of the current-asset property and will no longer be included either under "Gross amount due from customers for contract work" or "Gross amount due to customers for contract work." The reason for the increase of SEK 2,553 M (3,043) in interest-bearing liabilities is that invoicing of a cooperative housing association (Sweden) or housing corporation (Finland) will be recognized as a liability to the extent that it is related to residential units reported as current-asset property in the consolidated accounts. The previous accounting principle – revenue recognition of a sale of commercial properties on the contract date – normally involves the recognition of a purchase price receivable as an interest-bearing receivable. Interest-bearing receivables thus decreased by SEK -1,880 M (-1,681). The total impact on interest-bearing net receivables is SEK -4,433 M (-4,724). The effect on equity is SEK -577 M (-917).

New segment reporting

Skanska applies IFRSs in the Group's financial reports.

Effective from January 1, 2010, the Group is reporting its Residential Development and Commercial Development segments according to a new segment reporting method. The reason is that the new segment report more clearly illustrates how these segments carry out their operations and create value for the Group. According to the new segment reporting method, capital gains on property divestments are recognized when binding contracts are signed, unlike the previously used percentage of completion method (degree of accrual multiplied by degree of sales). The new segment reporting coincides with the way the Senior Executive Team monitors operations and will serve as the basis for dividend decisions by the Board of Directors. The design of the Group's incentive programs also mainly follows operating segment reporting. Profit for the year 2009 based on segment reporting is affected in the amount of SEK -626 M compared to the previously reported profit.

According to the new segment reporting method, capital gains on property divestments are recognized when binding contracts are signed, unlike IFRIC 15, in which gains are recognized when the property is handed over, as described in the above section on IFRIC 15. Due to the reporting of Residential Development and Commercial Development in compliance with IFRIC 15, property divestments are recognized with a time lag, which does not reflect operations.

The Construction and Infrastructure operating segments are reported in compliance with IFRSs.

In the Group's future quarterly reports and other financial presentations, segment reporting will serve as the basis for analysis.

Because of this segment reporting method, operating income in the Residential Development and Commercial Development segments diverges from operating income in compliance with IFRSs. In the balance sheet, this difference has affected working capital. Interest-bearing assets and liabilities have not been affected, and net financial items in segment reporting are thus the same as in IFRS-compliant accounting.

Effective from January 1, 2010, the residential and commercial development operations previously carried out in the Construction segment, primarily in Skanska Sweden, are being reported in the Residential Development and Commercial Development segments. This has adjusted 2009 income. The changes can be seen in the "Intra-Group transfer" column and in 2009 refers to Construction operations in Sweden.

As a result of the transition to IFRIC 15, Residential Development operations in Finland will not only have an impact on total revenue, which will be delayed, but also an impact on total revenue, since revenue consists of total accrued expenses with a profit increment and no longer the sale of shares in housing corporations.

The effects during 2009 of the transition to IFRIC 12 and IFRIC 15, the transfer of part of Swedish operations between segments plus the bridge to the new segment reporting method are presented by segment on the next page.

In Commercial Development, the transition to IFRIC 15 had a positive impact on 2009 income, totaling SEK +309 M, primarily due to the delay in profit recognition of certain projects in Europe from 2008. The transition to segment reporting, however, has an impact of SEK -418 M on operating income, because many property projects were completed during 2009 and few were started.

Application of IFRIC 15 increases operating income in Residential Development operations during 2009 by SEK +239 M. Especially in Swedish and Czech operations, there are sizable shifts in income between years. In Residential Development, too, segment income is SEK 443 M lower than in IFRIC 15-compliant accounting and is explained by low activity in new projects.

Construction operations, as they were reported previously, have also been affected during the full year 2009 as a consequence of IFRIC 15. Swedish operations have included projects that fall under IFRIC 15, and after the transition these projects now belong to the Residential Development and Commercial Development segments. During 2009 the transition to IFRIC 15 has a total impact of SEK -104 M on operating income in Construction, then an additional SEK -73 M due to the transfer of projects to the Residential Development and Commercial Development segments.

Segments, January - December 2009

The change by business stream during 2009 consists of three steps:

- Change of principles due to the introduction of IFRIC 12 and IFRIC 15, which affects the whole Group.
- The transfer from Construction to Residential Development and Commercial Development of the portion of Swedish construction operations that is also affected by IFRIC 15 and the new segment reporting method. This change also resulted in effects on Group eliminations.
- The bridge from IFRIC 15 to segment reporting
