“Skanska Commercial Property Development 2010” presents Skanska’s commercial development operations in detail.

Skanska Commercial Property Development initiates, develops, leases and divests commercial property projects, with a focus on office buildings, shopping malls and logistics properties. The business stream operates in markets where Skanska has construction business units in the Nordic countries, Central Europe and the United States, as well as in Denmark and Hungary.

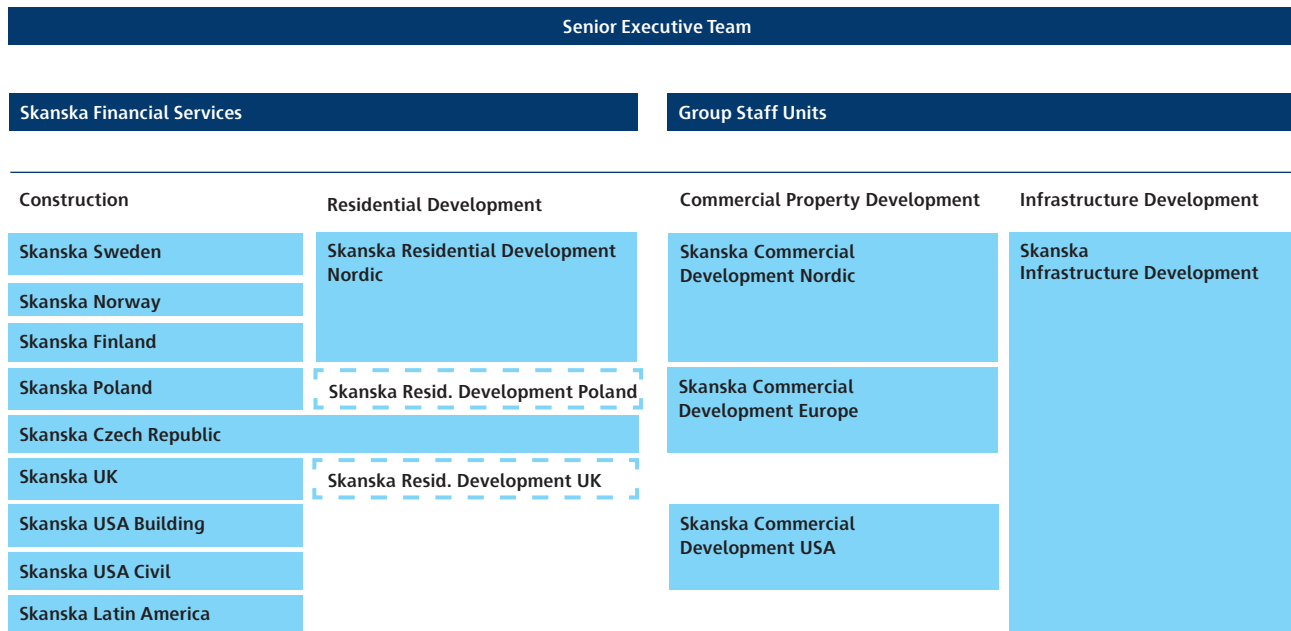

More information can be found in Skanska Annual Report 2010.

“Skanska Commercial Property Development 2010” is updated quarterly on the Group’s website www.skanska.com/en/Investors/ or can be ordered from Skanska AB, Investor Relations, SE-169 83 Stockholm, Sweden or via e-mail to investor.relations@skanska.se

The Court of Appeal in Malmö, Sweden. Completed in 2008.

Group organization and reporting structure

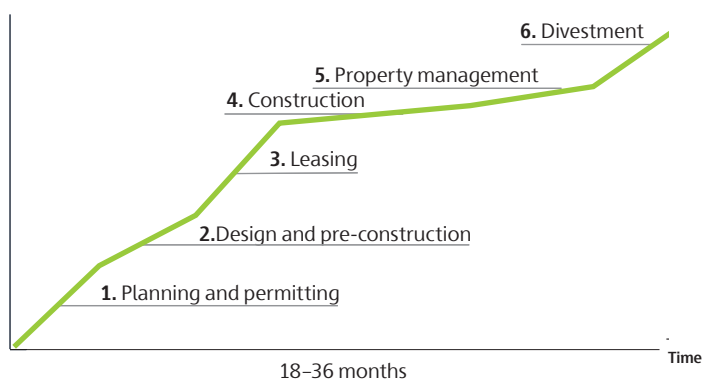

The development of commercial property projects is a continuous process with several clearly defined phases – planning and permitting, design and pre-construction engineering, leasing, construction, property management and divestment. The average development cycle is 18–36 months.

Generating value, step by step

1. Macroeconomic and market analyses precede a land purchase, which is the foundation of the value-generating process. A major step in value enhancement occurs when undeveloped land is transformed into a building right.
2. Suitable premises are designed, in close collaboration with tenants and prospective buyers.
3. Successful leasing work is a precondition for breaking ground. Larger tenants are contracted at an early stage.
4. The project developer orders construction services, as a rule from Skanska's own construction units.
5. Active management and customer relations can add further value to the property.
6. New projects are developed with an eye to future divestment. Sometimes a project can be sold while still in the construction phase.

Value creation in Commercial Property Development

Values and building rights

Commercial Development – Carrying amounts and market values

SEK M	Carrying amount, Dec 31. 2010	Carrying amount upon completion	Market value, Dec 31. 2010	Surplus value	Leasable space, 000 sq m	Economic occupancy level, %	Operating net, SEK M	Yield on carrying amount, %	Yield on market value, %	Projected rental value fully leased, SEK M	Average lease, years

Total	7,005	10,646	8,808	1,803	654		803				
Development properties ¹	2,995	2,995	3,490	495							
Total	10,000	13,641	12,298	2,298							

- 1 "Development properties" refers to land with building rights for commercial use, totaling about 1,460,000 sq.m. (15.7 million sq.ft.).
 2 Internal appraisal on each respective completion date. Accrued market value totaled SEK 7,046 M at completion.
 3 Estimated operating net before corporate and business area overhead in 2010 on annual basis assuming current occupancy rate.
 4 Estimated operating net before corporate and business area overhead fully leased in year 1 when the properties are completed.
 5 Total of contracted rents and estimated rent for unoccupied space.
 6 Estimated rental value fully leased in year 1 when the property is completed.

Market value and surplus value, completed projects, 2006-2010¹

SEK M	2006	2007	2008	2009	2010
Carrying amount	405	352	1,686	2,898	163
Surplus value	160	91	567	624	44
Market value	565	443	2,253	3,522	207

1 Excluding projects sold during the year of completion

Properties sold during 2010
