

American Depositary Receipts

To make the Skanska share more available to American investors Skanska sponsors a Level I American Depositary Receipt (ADR) program in the United States. The ADRs, which each represent one ordinary share of the Company, are publicly traded in the US on the OTC Market, under symbol SKSBY. The value of one Skanska ADR corresponds to the value of one Skanska share.

What are ADRs

American Depositary Receipts (ADRs) are dollar-denominated securities which represent ownership of equity in non-U.S. companies. ADRs trade, clear and settle like any U.S. shares and are held in U.S. custody.

Benefits of ADRs

- ADRs allow U.S. investors to trade locally in non-U.S. companies;
- Dividends are paid in U.S. dollars and the dividend tax re-claim process is taken care of by the depository bank, typically reducing dividend tax to the U.S. level (with the actual tax rate depending on the investor's individual circumstances);
- Global custodian safekeeping fees are eliminated when holding ADRs which usually make holding ADRs less expensive.

What is the role of Skanska's depository bank?

As Skanska's depository bank, J.P. Morgan issues and cancels Skanska's ADRs, serves as transfer agent, maintains the register of ADR holders and distributes dollar-denominated dividends to ADR holders.

How can I buy and sell Skanska ADRs

Institutional and individual investors can trade Skanska ADRs - or have them issued or cancelled - through a U.S. registered broker-dealer.

To obtain intraday quotes of the ADRs, please visit <http://www.otcmarkets.com/home>
